Forceps

Capsule

E2030

Kansas Nuclear Fragment Forceps

x 1

Two rows of teeth on jaws provide a firm purchase on the nucleus fragment for removal. Flat handle with dull finish. Overall length 110 mm.

E2077

Osher Capsule-Foreign Body Forceps

x 1

Fine 3 mm platforms. Angled 60°. Overall length 80 mm.

E3199 GW

Gills-Welsh Smith Capsule Forceps

x 1

Smooth Colibri tip used to grasp and subsequently retract the capsule during nucleus delivery. Serrated handle. Overall length 73 mm.

Capsulorhexis

65050

Capsulorhexis Forceps

x 1

Curved. Overall length 102 mm.

2-719

Utrata Capsulorhexis Forceps Titanium

x 1

The popular Utrata Capsulorhexis forceps in a titanium version. The ultra-fine tips are designed with an iris stop and angled platform tips for grasping delicate capsule. Titanium. Overall length 85 mm.

E2002 C

Lehner-Utrata Capsulorhexis Forceps

x 1

Utrata-like fine angled tips with gently curved shaft for performing capsulorhexis through tunnel incisions. Dull finish. Flat handle. Overall length 80 mm.

Capsulorhexis

E2002 F

Utrata Capsulorhexis Forceps

Delicate, fine angled tips ideal for grasping delicate capsule during 1.8 mm MICS procedures. And 12 mm shafts. Overall length 87 mm.

E2002 G

Gimbel Capsulorhexis Forceps

Similar in construction to the E2002 Utrata Capsulorhexis Forceps with jaw set to open only 3 mm. Light tension. Flat handle with dull finish. Overall length 80 mm.

E2002 GE

Utrata Capsulorhexis Forceps

Fine angled tips and 12 mm shafts. With iris stop. Overall length 87 mm.

E2002 M

Utrata MICS Capsulorhexis Forceps

Fine angled tips ideal for grasping delicate capsule during 1.8 mm MICS procedures. Angled 12 mm shafts with iris stop allows ease of movement in the anterior chamber. Flat handle with dull finish. Overall length 80 mm.

E2002 R

O'Gawa-Utrata Capsulorhexis Forceps

Fine angled tips with angled 13 mm shafts and iris stop. Round handle for fingertip rotational control. Dull finish. Overall length 112 mm.

E2002 RC

Lehner-Utrata Capsulorhexis Forceps Round Handle

Utrata-like fine angled tips with gently curved shaft for performing capsulorhexis through tunnel incisions. Dull finish. Round Handle. Overall length 112 mm.

Capsulorhexis

E2002S

Utrata Capsulorhexis Forceps Sharp Tips

The popular E2002 Utrata Capsulorhexis Forceps with fine angled sharp tips. Angled 12 mm shafts with an iris stop. Flat handle with dull finish. Overall length 80 mm.

E2026

Silverstein MICS 1.8 mm Capsulorhexis Forceps

This unique styled forceps are ultra-thin profile. Allowing maximum maneuverability through a sub-2.0 mm incision, without oar-locking or unnecessary distortion of the wound architecture during capsulorhexis. In addition the 5.0 mm and 6.0 mm marks on the anterior blade surface are designed to create a consistent, central capsulorhexis. Overall length 81 mm.

ET1088TS

Capsulorhexis Forceps Tip 15 mm Shaft

This forceps tip is designed with a pick type tip and is ideal for performing a capsulorhexis through a 1.4 mm incision. Has a gently curved shaft for optimal hand placement and control. Uses the ET8190 H Fixed Coaxial Handle (sold separately). Shaft length (hub to tip) 15 mm. Overall length 42 mm.

ET1202

Utrata MICS Capsulorhexis Forceps Titanium

Fine angled tips ideal for grasping delicate capsule during 1.8 mm MICS procedures. Angled 13 mm shafts with iris stop allows ease of movement in the anterior chamber. Titanium handle designed after the Stellaris® System handpiece. Overall length 107 mm.

ET2002

Utrata Capsulorhexis Forceps Titanium

Fine angled tips ideal for grasping delicate capsule. Angled 12 mm shafts with iris stop designed to ease the movement in the anterior chamber. Flat handle. Titanium. Overall length 80 mm.

Capsulorhexis

ET2002 RC

Lehner-Utrata Capsulorhexis Forceps Round Handle Titanium

Utrata-like fine angled tips with gently curved shaft for performing capsulorhexis through tunnel incisions. Dull finish. Round handle manufactured in titanium. Overall length 112 mm.

ET2009

Maloney Capsulorhexis Forceps

Titanium forceps with gently curved jaws and ultra fine sharpened tips for puncture and grasping the capsule. Round handle is optimal for finger-tip control. Overall length 104 mm.

ET2012

Devgan Micro Capsulorhexis Forceps

The ultra-fine tips of this cross action forceps are ideal for small incision procedures, including sub-2 mm coaxial phaco incisions. The mildly sharpened tips are designed to allow the surgeon to puncture the capsule and securely grab the capsule. 2.5 mm and 5.0 mm marks on the shafts are designed as a measuring tool, providing the radius and diameter of the capsulorhexis as it is being created. An iris stop feature is designed to provide the surgeon with optimal grasp of the capsule without engaging the iris. The cross action handle is designed for accurate alignment of the fine tips, reducing wound gape, loss of viscoelastic and AC shallowing. Overall length 119 mm.

ET8190 H

Coaxial Handle Fixed

Non-rotating handle for MICS procedures. Squeeze handle is easily activated. Titanium. Overall length 111 mm.

SUE01-12

Capsulorhexis Forceps

Angled jaws. 11.5 mm jaw length, fine sharp tips. 100 mm overall length. Packaged single. Sterile. 12/box.

SUE06-12

MICS Capsulorhexis Forceps

Fine angled tips ideal for grasping delicate capsule during MICS 1.8 mm procedures. Angled shafts allows ease of movement in the anterior chamber. Packaged single. Sterile. 12/box.

Forceps

Capsulorhexis

SUE07-12

Capsulorhexis Forceps with markings

The forceps shafts with markings at 2.75 mm/3.0 mm (radius) and 5.5 mm/6.0 mm (diameter), for determining the diameter for capsulorhexis. Fine angled tips ideal for grasping delicate capsule also during MICS 1.8 mm procedures. Angled shafts allows ease of movement in the anterior chamber. Packaged single. Sterile. 12/box.

SUE08-12

MICS Capsulorhexis Forceps with curved jaws

Fine angled tips ideal for grasping delicate capsule during MICS 1.8 mm procedures. Angled curved shafts allows ease of movement in the anterior chamber. Packaged single. Sterile. 12/box.

SUI20-12

MICS 1.0 mm Capsulorhexis Forceps

Angled endgripping platforms for grasping delicate capsule. 23GA shaft designed for performing capsulorhexis through a 1.0 mm incision. Low glare instrument shaft.

Chalazion

62021

Desmarres Chalazion Forceps

BAUSCH + LOMB
Instruments

20 mm jaws. Overall length 88 mm.

62022

Desmarres Chalazion Forceps

BAUSCH + LOMB
Instruments

26 mm jaws.

Chalazion

62023

Desmarres Chalazion Forceps

BAUSCH + LOMB
Instruments

31 mm jaws.

E2604

Desmarres Chalazion Forceps

BAUSCH + LOMB
Instruments

Oval solid 24 mm wide lower plate. Open upper plate with inside dimensions 12 mm x 20 mm. Serrated handle with locking thumb screw. Overall length 92 mm.

E2610

Francis Chalazion Forceps

BAUSCH + LOMB
Instruments

Oval solid 17 mm wide lower plate. Open upper plate with inside dimensions 12 mm x 14 mm. Serrated handle with locking thumb screw. Overall length 97 mm.

E2618

Hunt Chalazion Forceps

BAUSCH + LOMB
Instruments

Round solid 15 mm wide lower plate. Open upper plate with inside diameter 12 mm. Serrated handle with locking thumb screw. Overall length 97 mm, 3.8 inches.

E2632

Lambert Chalazion Forceps

BAUSCH + LOMB
Instruments

Round solid lower plate. Open upper plate with inside diameter 15 mm. Serrated handle with locking thumb screw. Overall length 97 mm.

E2640

Baird Chalazion Forceps

BAUSCH + LOMB
Instruments

Oval solid 15 mm wide lower plate. Open upper plate with inside dimensions 11 mm x 8 mm. Serrated handle with locking thumb screw. Overall length 97 mm.

Forceps

Cilia

61010

Beer Cilia Forceps

Round point. Overall length 78 mm.

61040

Henry Cilia Forceps

Straight jaws. Overall length 99 mm.

61050

Gradle Cilia Forceps

Rounded jaws. Overall length 100 mm.

61080

Barraquer Cilia Forceps

Overall length 111 mm.

E2156

Cilia Forceps

1x3 mm smooth platforms. Overall length 76 mm.

E2160

Cilia Forceps

Narrow smooth jaws. Overall length 83 mm.

Conjunctival

62130

Draeger Conjunctiva Forceps

Two pins 0.5 mm. 1.0 mm tip. Overall length 99 mm.

E2508

Original Putterman Clamp

BAUSCH+LOMB
Instruments

Designed for use during a Muller's muscle-conjunctival resection ptosis procedure. The clamp is used to incorporate conjunctiva and Muller's muscle between the superior tarsal border and the marking suture in order for suturing and resection to occur.

Corneal

63020

Corneal flap Forceps LASIK

Smooth tip forceps allows to manipulate and smooth the corneal flap. Also ideal for grasping/holding foldable IOLs. Tip angled 11 mm.

63031

Colibri Type Forceps

5 mm tying platform. Overall length 75 mm.

63032

Colibri Type Forceps

Extra delicate. 5 mm tying platform. Overall length 77 mm.

63038

Troutman-Barraquer Colibri Type Forceps

Extremely fine. 0.12 mm teeth. Overall length 73 mm.

Forceps

Corneal

2-132

Colibri Forceps 0.12 mm

0.12 mm 1 x 2 teeth with 5 mm platform and 2 mm angled tips. Flat serrated handle, dull finish. Titanium. Overall length 86 mm.

E2015

Snyder Stripping Forceps

Tips of these forceps are angled upwards to grasp the edge of Descemet's membrane to complete the stripping technique. Iris stop designed to grasp the membrane without grasping iris or other ocular structures. Overall length 83 mm.

E2039

Carlson DSEK Graft Forceps

These forceps are designed to grasp the graft for insertion into the anterior chamber. The forceps platforms at the tip provide secure grasp at the tip and a platform at the rear of the forceps arms provide a mechanical stop. Overall length 85 mm.

E3190

Katzin-Barraquer Corneal Forceps

7 mm tying platform with 1 x 2 teeth 0.4 mm. Overall length 73 mm.

E3199

Troutman-Barraquer Corneal Utility Forceps

Colibri style. 1 x 2 teeth 0.12 mm. Overall length 73 mm.

E3215

Polack Double Corneal Forceps Colibri Style

Two 2.75 mm long tips separated 1 mm with 1 x 2 teeth. Serrated handle with dull finish. Overall length 71 mm.

Corneal

ET3199

Colibri Forceps 0.12mm

0.12 mm. 1 x 2 teeth. Serrated handle with polished finish. Titanium. Overall length 73 mm.

Cracking

2-800

A. W. Brown Nucleus Cracker

A reverse action instrument with paddle tips to provide a solid surface to crack the nucleus. When used in a scleral tunnel, the reverse action mechanism allows increased flexibility in positioning the instrument tips. Titanium. Overall length 98 mm.

Fixation

E1553

Moody Curved Fixation Forceps

Curved shafts with 0.5 mm, 1 x 2 teeth. Serrated handle with thumb catch lock and polished finish. Overall length 108 mm.

E1560

Graefe Fixation Forceps

With narrow 3.5 mm jaws. Fine teeth. Without lock. Overall length 108 mm.

E1654

Lester Fixation Forceps

Fine 1 x 2 teeth. Overall length 96 mm.

Fixation

E1656

Lester Fixation Forceps

Fine 2 x 3 teeth. Overall length 96 mm.

E1684

Elschnig Fixation Forceps

Straight shafts with 2.0 mm, 1 x 2 Elschnig style teeth. Narrow handle. Overall length 109 mm.

E1717

Osher Conjunctival Fixation Forceps 0.3 mm

Straight shafts with 5.5 mm tying platform and 45° 0.3 mm teeth. Wide serrated handle with polished finish. Overall length 108 mm.

E1730

Thorpe Conjunctival Fixation Forceps

Straight shafts with 90 degree, 2 x 3 teeth. With tying platform. Overall length 94 mm.

E1732

Thorpe Corneal Fixation Forceps

Straight shafts with 45 degree, 2 x 3 teeth 0.12 mm. Overall length 94 mm.

E1735

MacGregor Conjunctiva Forceps

Straight shafts with 5.5 mm tying platform and 1 mm criss-cross serrated tips. Serrated handle with polished finish. Overall length 108 mm.

E1736

MacGregor Conjunctiva Forceps Wide

Straight shafts with 5.5 mm tying platform and 1 mm criss-cross serrated tips. Wide serrated handle with polished finish. Overall length 110 mm.

Fixation

E1793

Castroviejo Fixation Forceps

Straight shafts. 1 x 2 teeth 0.3 mm.
Overall length 108 mm.

E1795

Castroviejo Fixation Forceps

1 x 2 teeth 0.5 mm. Overall length 109 mm.

E1943 22

Pierse Colibri Forceps Micro

Colibri style 0.1mm Pierse tips. Flat open handle with dull finish. Overall length 78 mm.

Intraocular Lens

ET2912 CE

IOL Loading Forceps

This IOL loading forceps is designed for use with BLIS injector. The forceps grasps and places the IOL into the IOL cartridge.

2-700

Shepard IOL Insertion Forceps

Curved 18 mm shafts with 1.91 mm wide grasping tip. Flat, serrated cross action handle with dull finish. Titanium. Overall length 108 mm.

65245

IOL Grasping Forceps

Delicate round jaws, angled 50°. Overall length 110 mm.

Intraocular Lens

65400

Doden Implant Forceps

With perforated handle. 9 mm jaws.
Overall length 120 mm.

65520

Forceps Folding Akreos

45° angled. 14.5 mm angle from tip to bend.

E2976

Osher-Seibel Folding Forceps

A gently curved forceps designed to easily fold today's soft intraocular lenses. The serrated handle ensures a firm grip throughout the folding procedure. Overall length 107 mm.

E2988

Thornton Intraocular Lens Forceps

Facilitates grasping and implanting the haptic loop beneath the pupil margin and within the capsular bag without wrist twisting. Angled 45° 11 mm long jaws are placed in the same vertical plane as the handle. Smooth, flat, cross action handle with dull finish. Overall length 86 mm.

65530

Juenemann IOL Explantation Forceps

The serrated forceps is designed for explantation of Silicone IOLs without cutting. The serrations of the slim jaws help to securely grasp the IOL inside the capsular bag. Minimum incision size is 2.5 mm.

Iris

64090

Iris Forceps, Mod. Bonn

Delicate. Overall length 75 mm.

64091

Iris Forceps, Mod. Bonn

Delicate. Angular. Overall length 75 mm.

64220

Iris Forceps, Bonn-Conrads

Serrated. Overall length 73 mm.

E1475

Gill Curved Iris Forceps

Delicate curved shafts. Serrated tips. Serrated handle. Overall length 72 mm.

Lid

E2500

Berke Ptosis Forceps

BAUSCH + LOMB
Instruments

20 mm blades. Curved shafts. Straight blades. With lock. Overall length 98 mm.

E2504

Berke Ptosis Forceps

BAUSCH + LOMB
Instruments

27 mm blades. Curved shafts. Straight blades. With lock. Overall length 104 mm.

Forceps

Lid

E2515

Erickson-Lee Ptosis Clamp

BAUSCH + LOMB
Instruments

Offers contoured, refined jaws for improved fit to the eye, increased visibility and ease of suturing. Offers a secure grip of the tissues while easily locking and releasing. The slide lock design aids in positioning the clamp during use. Overall length 96mm.

Miscellaneous

E1946

Jeweler Type Forceps Wide Serrated Handle

Straight shafts with 3 mm criss-cross serrated platform. Polished finish. Wide serrated handle. Overall length 109 mm.

E1892

Nugent Utility Forceps

Angled serrated 10 mm jaws. Overall length 107 mm.

E1900

Wills Hospital Utility Forceps

Straight shafts with 13 mm criss-cross serrated platform with polished finish. Serrated handle. Overall length 109 mm.

E1904

Bonaccolto Utility Forceps 1.2 mm Platform

Straight shafts with 16 mm long platform. Lengthwise serrated jaws with cross serrated tips. Serrated handle with polished finish. Platform: 1.2 mm wide. Overall length 108 mm.

E1947 T1

Jeweler Type Forceps Fine Tying Platform

Straight shafts with pointed tips and 6 mm tying platform. Smooth handle with dull finish. Fine pointed tips. Overall length 120 mm.

Miscellaneous

E1947 T5

Jeweler Type Forceps Extra Fine Tying Platform Narrower

Straight, shafts more narrow where shaft meets the handle. Extra fine pointed tips and 6 mm tying platform. Smooth handle with dull finish. Overall length 110 mm.

E8164

Kennerdell Bayonet Forceps

Bayonet shafts with serrated tips. Serrated handle with dull finish. Tip to bend: 83 mm. Tips: 17 mm. Serrated. Without teeth. Overall length 160 mm.

Muscle

67120

DeDecker Muscle Forceps

Tip 40° angled. 7 mm from tip to bend. Inner jaws serrated. Overall length 127 mm.

E2304

Bishop Tendon Tucker

Triangular tips. marked for 5 and 10 mm tucks. Overall length 117 mm.

E2330

Jameson Muscle Forceps Left

Angled shafts with 12 mm scaled jaws. 1 mm teeth on one jaw fit into holes on the other jaw. Slide lock and serrated handle with polished finish. Left. Overall length 100 mm.

E2331

Jameson Muscle Forceps Right

Angled shafts with 12 mm scaled jaws. 1 mm teeth on one jaw fit into holes on the other jaw. Slide lock and serrated handle with polished finish. Right. Overall length 100 mm.

Forceps

Muscle

E2334

Jameson Muscle Forceps Left Child Size

x 1

Angled shafts with 9 mm scaled jaws. 1 mm teeth on one jaw fit into holes on the other jaw. Slide lock and serrated handle with polished finish. Left. Overall length 99 mm.

E2335

Jameson Muscle Forceps Right Child Size

x 1

Angled shafts with 9 mm scaled jaws. 1 mm teeth on one jaw fit into holes on the other jaw. Slide lock and serrated handle with polished finish. Right. Overall length 99 mm.

Mosquito

E3915

Hartman Straight Hemostatic Forceps

x 1

Straight 20 mm serrated jaws. Ring handle with ratchet lock. Overall length 99 mm.

E3916

Hartman Curved Hemostatic Forceps

x 1

Curved 20 mm serrated jaws. Ring handle with ratchet lock. Overall length 99 mm.

E3920

Halstead Straight Hemostatic Forceps

x 1

Straight 22 mm serrated jaws. Ring handle with ratchet lock. Overall length 125 mm.

E3922

Halstead Curved Hemostatic Forceps

x 1

Curved 22 mm serrated jaws. Ring handle with ratchet lock. Overall length 120 mm.

Retinal

65365

Trocar Ports Grasping Forceps

Forceps for grasping trocar ports in 23G and 25G PPV surgery. For easy removal of trocar port from sclera. Compatible with the Bausch + Lomb Entry Site Alignment (ESA) valved cannula system.

E5378

Watzke Sleeve Spreading Forceps

Designed to spread silicone sleeves for circling bands. Serrated 10 mm tips. Angled 30°. Overall length 114 mm.

ET8198H

StableGrip™ Vitreoretinal Handle

This contoured handle is ideal for all StableGrip™ vitreoretinal tips. The enhanced activation design facilitates smooth and consistent tip closure. The fingertip rotation control allows for accurate tip alignment. Titanium construction provides balance and tactile control. 20 Gauge, 23 Gauge and 25 Gauge forceps and scissors sold separately. Overall length 104 mm.

ET8309

23 Gauge StableGrip™ Asymmetrical Peeling Forceps

Used for ILM and epiretinal membrane peel. For use on macular puckers and cellophane maculopathy. The asymmetric jaw is designed to allow the surgeon to see over the instrument to visualize retinal tissue. The front half of this instrument is violet to indicate an asymmetrical peeling forceps. The back half is colored green to indicate 23 Gauge. Use with ET8198H StableGrip™ Vitreoretinal Handle sold separately. Overall length 55 mm.

Retinal

ET8310

23 Gauge StableGrip™ ILM Forceps

x 1

Specifically designed to remove delicate ILM and epiretinal membrane. A smaller jaw provides better visualization of tissue and optimal grasping ability of delicate tissue. The front half of this instrument is silver to indicate an ILM forceps. The back half is colored green to indicate 23 Gauge. Use with ET8198H StableGrip™ Vitreoretinal Handle sold separately. Overall length 55 mm.

ET8312

23 Gauge StableGrip™ Endgripping Forceps

x 1

These forceps are designed to peel epiretinal membrane and ILM. This instrument provides a smaller delicate grasp of tissue. Less mass at the tip of the instrument allows for easier visualisation of tissue and grasp of delicate membranes. The front half of this instrument is light blue to indicate an endgripping forceps. The back half is colored green to indicate 23 Gauge. Use with ET8198H StableGrip™ Vitreoretinal Handle sold separately. Overall length 56 mm.

ET8508

25 Gauge StableGrip™ Micro Pic Forceps

x 1

Forceps has 0.4 mm rotatable tips with roughened jaws. These forceps are used to peel epiretinal membrane. The dual function of the instrument is designed to create the ability to lift the membrane with the angled pic and then solidly grasp tissue with the platform. The front half of this instrument is bronze to indicate a micro pic forceps. The back half is colored dark blue to indicate 25 Gauge. Use with ET8198H StableGrip™ Vitreoretinal Handle sold separately. Overall length 57 mm.

ET8509

25 Gauge StableGrip™ Asymmetrical Peeling Forceps

x 1

Used for ILM and epiretinal membrane peel. For use on macular puckers and cellophane maculopathy. The asymmetric jaw is designed to allow the surgeon to see over the instrument to visualize retinal tissue. The front half of this instrument is violet to indicate an asymmetrical peeling forceps. The back half is colored dark blue to indicate 25 Gauge. Use with ET8198H StableGrip™ Vitreoretinal Handle sold separately. Overall length 56 mm.

Retinal

ET8510

25 Gauge StableGrip™ ILM Forceps

Specifically designed to remove delicate ILM and epiretinal membrane. A smaller jaw provides better visualization of tissue and optimal grasping ability of delicate tissue. The front half of this instrument is silver to indicate an ILM forceps. The back half is colored dark blue to indicate 25 Gauge. Use with ET8198H StableGrip™ Vitreoretinal Handle sold separately. Overall length 58 mm.

ET8512

25 Gauge StableGrip™ Endgripping Forceps

These forceps are designed to peel epiretinal membrane and ILM. This instrument provides a smaller delicate grasp of tissue. Less mass at the tip of the instrument allows for easier visualization of tissue and a precise grasp of delicate membranes. The front half of this instrument is light blue to indicate an endgripping forceps. The back half is colored dark blue to indicate 25 Gauge. Use with ET8198H StableGrip™ Vitreoretinal Handle sold separately. Overall length 56 mm.

ET8514

25 Gauge StableGrip™ Micro Forceps

Forceps has 0.4 mm rotatable tips with roughened jaws. These forceps are designed to peel epiretinal membrane. The dual function of the instrument gives the ability to lift the membrane with the angled pic and then solidly grasp tissue with the platform. The front half of this instrument is green to indicate a micro forceps. The back half is colored dark blue to indicate 25 Gauge. Use with ET8198H StableGrip™ Vitreoretinal Handle sold separately. Overall length 58 mm.

Retinal

65023S-12

23GA Endgripping Forceps

23GA single-use end gripping vitreoretinal forceps. These forceps are used to peel Epiretinal membrane and also ILM. Low glare instrument shaft. Sterile single-use. 12/box.

65025S-12

25GA Endgripping Forceps

25GA single-use end gripping vitreoretinal forceps. These forceps are used to peel Epiretinal membrane and also ILM. Low glare instrument shaft. Sterile single-use. 12/box.

SUI13-12

27GA Endgripping Forceps

27GA single-use end gripping vitreoretinal forceps. These forceps are used to peel Epiretinal membrane and also ILM. Low glare instrument shaft. Sterile single-use. 12/box.

SUI03-12

23GA Asymmetric Peeling Forceps

Features an asymmetric jaw which allows for optimal visualization of retinal tissue. The sleek, ergonomic handle is consistent with our popular reusable design. Used for ILM, Epiretinal Membrane Peel, macular puckers and cellophane maculopathy. The balanced design provides optimal feel and control. 23 Gauge. Packaged sterile. Single-Use. 12/box.

SUI05-12

25GA Asymmetric Peeling Forceps

Features an asymmetric jaw which allows for optimal visualization of retinal tissue. The sleek, ergonomic handle is consistent with our popular reusable design. Used for ILM, Epiretinal Membrane Peel, macular puckers and cellophane maculopathy. The balanced design provides optimal feel and control. 25 Gauge. Packaged sterile. Single-Use. Overall length: 135 mm. 12/box.

Retinal

SUI09-12

20GA Endgripping ILM Forceps

20GA single-use end gripping vitreoretinal forceps. Specifically designed to remove delicate ILM and epiretinal membrane. Low glare instrument shaft. Sterile single-use. 12/box.

SUI07-12

23GA Endgripping ILM Forceps

23GA single-use end gripping vitreoretinal forceps. Specifically designed to remove delicate ILM and epiretinal membrane. Low glare instrument shaft. Sterile single-use. 12/box.

SUI08-12

25GA Endgripping ILM Forceps

25GA single-use end gripping vitreoretinal forceps. Specifically designed to remove delicate ILM and epiretinal membrane. Low glare instrument shaft. Sterile single-use. 12/box.

SUI10-12

20GA Serrated Forceps

20GA single-use serrated vitreoretinal forceps. The jaws of these forceps have serrations inside for non-slip gripping. Designed for peeling and manipulating thicker and more fibrotic membranes. Sterile single-use. 12/box.

SUI11-12

23GA Serrated Forceps

23GA single-use serrated vitreoretinal forceps. The jaws of these forceps have serrations inside for non-slip gripping. Designed for peeling and manipulating thicker and more fibrotic membranes. Sterile single-use. 12/box.

SUI12-12

25GA Serrated Forceps

25GA single-use serrated vitreoretinal forceps. The jaws of these forceps have serrations inside for non-slip gripping. Designed for peeling and manipulating thicker and more fibrotic membranes. Sterile single-use. 12/box.

Forceps

Retinal

SUI14-12

27GA Serrated Forceps

27GA single-use serrated vitreoretinal forceps. The jaws of these forceps have serrations inside for non-slip gripping. Designed for peeling and manipulating thicker and more fibrotic membranes. Sterile single-use. 12/box.

Scleral Plugs

65360Y1

Forceps For Scleral Plugs

Width of tip 0.85 mm. Overall length 100 mm.

E8709

Plug Removal Forceps 25 Gauge

Forceps used to remove scleral plugs used in a 25GA trocar system. Overall length 84 mm.

Suturing

2-110

Bonn Suturing Forceps 0.12 Titanium

0.12 mm 1x2 teeth with 6 mm platform. Flat serrated handle with dull finish, Titanium. Overall length 85 mm.

SUE02-12

Bonn Forceps

Straight jaws. 1x2 teeth 0.12 mm. 3.5 mm tying platform. For tissue manipulation and bulbus fixation. 100 mm overall length. Packaged single. Sterile. 12/box.

Suturing

62041

Castroviejo Suturing Forceps

1 x 2 teeth 0.5 mm. 6.5 mm tying platform.
Overall length 101 mm.

62042

Castroviejo Suturing Forceps

1 x 2 teeth 0.9 mm. 6.5 mm tying platform.
Overall length 101 mm.

62071

Paufique Universal Suturing Forceps

6 mm tying platform. Overall length 87 mm.

62072

Paufique Universal Suturing Forceps
